

Skylabs (VSL)

Launching 21st Aug

Vetter Ecosystem is pleased to announce the upcoming presale for Skylabs (\$VSL) on August 21st at 3pm EST. Limited to 1,000 whitelist participants.

SKYLABS

VETTER
ECOSYSTEM

What is the Vetter Ecosystem?

The Vetter Ecosystem is a community-led project that raises the bar for integrity and reputability in the decentralized finance space. Through community-set standards and benchmarks for excellence in early blockchain projects, community members have the opportunity to make wise investments in new projects — before they even hit the market.

The Vetter Ecosystem is expanding this summer, as the project prepares to launch the Vetter Skylabs Launchpad (VSL) token. VSL stakers are guaranteed allocation for top-tier, highest-vetted, exclusive projects.

3 Reasons to Share Vetter Ecosystem's Skylabs (VSL) Presale with Your Audience

Experience

Skylabs (VSL) is a top-tier Launchpad opportunity with an experienced 9-person in-house dev team and a proven success track record. Their first project launched the CrowdX dApp last year and is now used by over 10,000 investors to access trusted data on early-stage blockchain projects. The team has innovated many propriety Web3 solutions with more pending release later this year (see roadmap).

Trust

The Vetter Ecosystem has already earned trust in the DeFi community, establishing itself as a credible, fully doxxed resource for early-stage blockchain project research. The VSL token offers non-custodial staking— which means the tokens staked are safely secure in the smart contract, controlled by the staker (2 CertiK Audits).

Opportunity

Those who secure a spot on the whitelist have an opportunity to join the Skylabs (VSL) presale. This gives access to \$VSL at its lowest price, which means more guaranteed allocations in top-tier projects launching from Skylabs, as well as Royalties that share revenue with stakers. 1,000 whitelist spots available.

*VSL token stakers will have VIP access to exclusive blockchain projects meeting the highest standards. Only they can participate in projects that launch from Vetter Skylabs Launchpad.

Our Vision:

An encouraged, sovereign community of investors who recognize the trust in decentralised finance and strive to influence the future of blockchain innovation and regulation.

Our Mission:

To empower the investor to make smarter investments for themselves based on research-backed data collated from Web3 crowdsourcing to support financial sovereignty with balance between decentralisation and centralisation.

Our Impact:

A community of mature investors brought together by community-defined metrics and benchmarks of a successful early-stage blockchain project.

Community-Elected Project Architects

Robyn Linn

Head of Business, Brand & Communications

As an innovator and mentor to startups for over 20-years taking them from zero to multiple-millions— Robyn's mastery runs deep. With a focused refinement in branding, marketing, business development, and communications, Robyn leads with both the head and the heart. Her innate stage and video presence leads in ways that inspire genuine connection. From internal operations and execution, to leading devs and whale groups on behalf of the vision itself— Linn innovates resiliently, producing new messaging and branding with a flow that is almost superhuman. The ultimate thought leader in her space that magnifies in the most elegant way. Connect with her on LinkedIn [here](#).

Each year the community votes on who will be the visionary architects to make key decisions on behalf of the Vetter Ecosystem as the DAO governance tools and guidelines are developed. This process includes an in-house blockchain-authenticated voting contract used for community-directed decisions. See Whitepaper for more details.

Mike Klingler

Lead Visionary

Affectionately called 'The Wiz of Oz,' Klingler is tirelessly bustling behind-the-scenes to bring the Vetter community into further advancement for its vast ecosystem. Klingler serves as a global visionary, proposing striking ideas that the community can implement, develop, and bring to market— all with the ultimate goal of bringing decentralised freedom to the Vetter Ecosystem and Skylabs family. Evolving faster than you can say.. Decentralised Finance! Connect with him on LinkedIn [here](#).

Jeremy James

Head of Software Innovation

James' responsibilities include creating new smart contracts, which he does brilliantly with a team of 9 in-house devs. He is the go-to genius in the Vetter tech community, specializing in 'creating what hasn't ever existed before.' James innovates and constantly improves Vetter's very own digital infrastructure as a Web3 trailblazer. James is known in the Vetter community as a reliable leader, offering his team solutions to tech challenges. A remarkable developer! Connect with him on LinkedIn [here](#).

Vetter's Approach

- Identifying the future of successful projects with the greatest returns within a solid community of mature investors, while bringing integrity and trust to the world of decentralised finance.
- Providing the tools needed for success when investing in early-stage blockchain projects with the CrowdX dApp— a Web3 tool that leverages crowdsourced investor research data, utilised by thousands of members to find the best new-to-market projects.
- Thoroughly 'vetting' projects using community-decided metrics and benchmarks for a promising investment, without giving financial advice.

Vetter's Accomplishments

- Vetter token, the first project developed and launched by Vetter Ecosystem, saw a 40x (4000%) return for presale participants at its highest point. At its lowest point, it never dropped below a 4x (400%) return. Even in August of 2022 during a bear market, it maintains above a 6x (600%) return
- Over 10,000 people using Vetter's dApp, created by their in-house developer team
- Trusted research on early-stage blockchain projects based on community-gathered metrics and benchmarks that could make for an excellent project to invest in
- CrowdX Platform, offering extensive tools such as Vetter Tracker, used to give notifications of project launch updates to users, to make project research easier for the Vetter Community
- Skylabs Launchpad and Vsale Launchpad, offering access to top-tier early-stage projects to onlookers, vetted at the highest standards, where stakers receive royalties from revenue generated at both launchpads
- Launch of Vetter Skylabs (VSL) token in late August of 2022, with spots currently up for grabs on their high-in-demand, exclusive whitelist

Vetter Ecosystem in Europe: Blockchain & Web3 Events

For more than 2 months, Vetter Ecosystem held widely popular events across Europe, where its Lead in Communications & Business Advisor, Robyn Linn, took to the stage. She discussed innovative projects in the blockchain & Web3 space & offered solutions to developers facing deep challenges when launching their new projects.

ECOSYSTEM ROADMAP

2021

- ✓ Vetter Token Launched
- ✓ Vetter dApp V1 Released
- ✓ 10,000+ dApp Users

2022

Q1

- ✓ CrowdX Launched
- ✓ Vetter dApp v2 Released
- ✓ Skylabs (VSL) Private Sale

Q2

- ✓ Vetter dApp & CrowdX upgrades to add new tools such as auditing, CrowdX Calendar, Vetter Tracker, Vetter University, and more.
- ✓ Vetter Ecosystem tours Europe to lead Web3 and Blockchain events
- ✓ Vsale launchpad released

Q3

- ✓ Skylabs (VSL) presale and public launch with staking and revenue-based royalty roll-out
- ✓ Skylabs launchpad released
- ✓ CEX listings
- ✓ Expand Vetter Swap to Any BSC Token
- ✓ Vetter University expands to add new courses

Q4

- ✓ Launch of VetterVine and VetterNFT dApps
- ✓ Launch of Vetter Charting tool with VetterTA dApp
- ✓ Introduce Launchpads on emerging and popular chains

Skylabs VSL Launchpad

Vetter is launching Skylabs (VSL) the 21st of August with guaranteed allocations going to \$VSL stakers in top-tier projects that meet only the highest standards. Projects must demonstrate strong fundamentals with a clear path to revenue.

- Staking is non-custodial (SAFU)
- Stakers get guaranteed allocations in exclusive projects and Revenue Shares
- 2 Certik Audits; 9-person in-house Dev team; Proprietary Web3 development
